DETAILED ACTION

This application was filed 2/6/2004 and is a CON of 10/300,967 (11/20/2002, US Patent #6,753,428), which claims benefit of Provisional Application 60/332,148 (11/20/2001). Claims 1-13 were deleted by paper dated 8/6/2004. Claims 14-24 are before the Examiner.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 14-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, it is unclear as to what enantiomer is being made by the instant process. Also, what is the selected racemization reaction temperature? What enantiomer of formula II is being contacted? Clarification is required.

Allowable Subject Matter

3. Claims 14-24 are free of prior art. The closest art is Medina (US Patent 6,794,379) which teaches a racemization reaction on column 69-72 similar to the instantly claimed

reaction. However, the reactants used in the reaction process are different from the instantly claimed reactants. Without a reason to change the reactants, the instant claims are free of prior art.
